> JavaScript	> Node.js	> GitHub
> HTML	> MongoDB	> Postman
> CSS	> JSON	> VS Code
> React	> RESTful APIs	> Slack
> Bootstrap	> TDD & BDD	

PROJECTS

CRUD MOVIE APPLICATION

<https://github.com/kellysdev/movie-client>

Live app: <https://popopolis.netlify.app/login>

- Single-page, responsive app with routing, several interface views, and a polished user experience.
- Client-side built with React and Bootstrap as well as React-Router and Parcel. It is hosted on Netlify.
- The server-side is a REST API built with Node.js, Express and MongoDB. API endpoints were tested with Postman and the API is deployed on Heroku. Utilizes JWT authentication.

MEET REACT APPLICATION

<https://github.com/kellysdev/meet>

Live app: <https://kellysdev.github.io/meet/>

- A serverless, progressive web application built using a test-driven development technique.
- Fetches and displays events from the Google Calendar API and renders event data in charts using Recharts.
- Uses AWS for the authorization server and uses OAuth 2 authentication.

EDUCATION

CAREER FOUNDRY
